The substitution of spurious or adulterated for genuine drugs is one of those abuses that, fortunately, with the increase of scientific knowledge, is very materially decreasing; still, great care must continue to be exercised. To still further decrease this evil, and to facilitate a greater familiarity with the appearance that the spurious drug affords, as contrasted with the genuine, the following tabular arrangement shows, side by side, the essential characters of the drug in a state of purity, with those that mark the inferior quality or the substitution of some other article. The principal drugs are, however, here alone enumerated;a more complete table is given in the larger work of the author. Thick; rough. Fracture--Close;almost resinous.
